

Hi FCC--

I just wanted to drop you this short note to let you know how K-Love (FM 91.1) serves me in my local community. I listen not only in the Metro Denver area but when I travel to more remote areas, I can tune in the alternate frequency and still hear my shows.

If you were to displace my station with a LPFM station, it would really hurt. Virtually all of my listening is done on this one station, and taking it away would very much hurt my quality of life. Please don't do it.

With so many stations talking about bodily fluids and sex, it is a refuge to be able to listen to the radio and not have to try and screen out all the language and profanity found on so many other stations. As our society becomes more and more degraded morally, the public needs a place they can listen to that holds true to traditional values.

I'm not saying the other stations have no value, they do. I just think that if you replace my station with an LPFM, I'll have ZERO other choices for my music and information. Besides, I pay for this station to be on the air-- not commercials. Keeping the LPFM out of my station is something I really want you to do.

Take care,

Doug Gordon
